

# Project-Making in Real Tools

Please take a moment to go over these instructions before you get started!

## **RULES:**

- Safety glasses are required when sawing. Gloves are required when cutting metal. Aprons and ear protection are also available!
- No children under 3 years old are permitted in the project-making area.
- All project-makers must have the assistance of an adult.

## **STEPS:**

### **I. Designing Your Project**

- What would you like to make?
- Do you need to make a drawing?
- Do you have time to make this?

### **II. Tools and Supplies**

- Spend some time looking around!
- What materials will you choose?
- What tools will you use?
- *Please take only what you need, so there is enough for everyone.*

### **III. Finishing Your Project**

- How will you connect it together? (Tape, glue, staples, nails, screws, rubber bands, string...or something else?)

## **WHEN YOU'RE DONE:**

- Make sure to tidy up!
- If you will be playing in the museum, please take your project to the front desk.
